##### ● Notes on connection

a) Any type of this series has no built-in overcurrent protective circuit. So be careful never to make any load short-circuit.

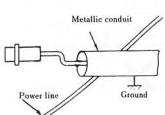

b) The cord length should be shorter than 200 m.

##### ● Wiring

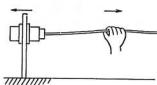

If a power line or the line is near the proximity switch cord, lay the cord separately in a conduit to prevent from surge or noise influence.

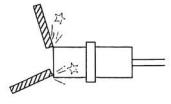

Never lay in the same conduit.

#### ● Handling

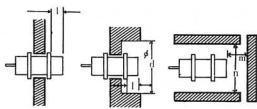

b) Do not pull the cord forcibly.

c) Do not hit or damage the sensor head.

#### ● Influence by nearby metal

Be sure to space a nearby metal from the sensor as a distance greater than that shown below, to prevent malfunctions.

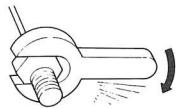

#### Nearby metal clearance (unit: mm)

Type	E2K-X4M □	E2K-X8M □	E2K-X15M □
l	20	20	10
d	50	50	50
m	8	12	25
n	60	60	60

#### ● Installation

a) Do not overtighten.

#### ● Mutual interference

Be sure to space the two sensor at a distance greater than that shown below, to prevent mutual interference.

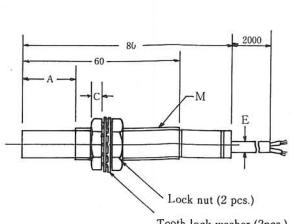

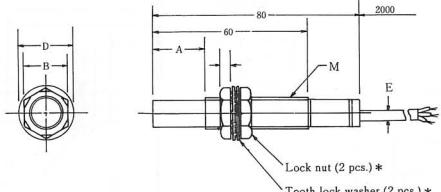

#### Allowable tightening torque (Unit: mm)

Type	Strength	Torque (kg·f·cm)
E2K-X4M □		20
E2K-X8M □		40
E2K-X15M □		135

Type	Distance	A	B
